

# Nursery Newsletter

We have enjoyed welcoming our children back into Nursery after the Christmas break, and are glad to see such enthusiasm for learning as we begin the New Year!

This half term we will be looking closely at winter and what happens during the season, paying close attention to the beautiful tree in our playground. We will be discussing the life cycle of leaves, and what happens to leaves and other parts of nature in during the winter. To help us to do this we will be focusing on the book 'Winter is Here' by Heidi Pross Gray to spark lots of curiosity and discussion around the topic.

We will also be looking at 2D shapes this half term, with a focus on mathematical language to describe them such as 'round', 'straight', 'edges' and 'corners'. We will be trying to apply our knowledge by looking for shapes in the environment on shape hunts, and categorising shapes through maths activities.
